

**School Nurses: Give this document to your families. Call me if you have any questions. I'm here to help you and your students' families! Pam Henry – (972) 841-1311.**

*Note to parents: If you already have a MyCareConnect/BlueLoop account for your child, please log in to your account and click "My Schools" in the Patient Profile tab, then enter my unique verification code, which is found below in step 5, or contact me for my unique verification code.*

I found an online and mobile service I'd like you to consider using to help us communicate better with each other throughout the year. It was created by a mom of a child with diabetes.

**BlueLoop** is online and mobile and allows all caregivers - parents, nurses, teachers, etc. - to put information like BGs, carbs, inhaler use and notes into your child's account and instantly send a text and/or email notification so that we are all in the loop and know how your child is doing without making phone calls or sending hand-written notes. It's also a great way for me to send you information, like when I'm low on supplies or need more snacks.

Here's what you need to do:

1. Go to <https://blueloop.mycareconnect.com>.
2. Click on the button that says, "Sign Up Now", "Family Signup".
3. Set up your child's account, which is FREE
4. In the Patient Profile tab, click the "My School" link on the left-hand side.
5. Enter my unique verification code: \_\_\_\_\_

Once you've completed the above steps, I'll see your child's name when I log into BlueLoop. I can enter information and notes as described above, and you'll immediately receive a notification that tells you everything I entered.

Thank you! If you have any questions or concerns, please feel free to contact me.

Sincerely,

Your school nurse
